Night Class - Jim Gordon, Viola Neal - Shaffica Karagulla Meeting
Little Fox, Tucson - Thomse: Anti-Christ - Foundation Matters -
Architect - 1984

JG:

Kut Humi.

This is Kut Humi - I come to you from the Himalayas, speaking to you as I sit here contemplating on the light of the universe. I seek to express this light into humanity in the form of Love, for it is through Love that man begins to find the manifestation of God within. And therefore I seek ever to express that Love to humanity in whatever manifestations I can. I seek to raise up man's hearts and minds into the universal Love expression, taking away the individual self-love expression that man often gets caught up in. Getting caught up in that particular expression of self-love, the true universal love is lost and mankind becomes self-oriented and becomes selfish in his endeavors. I seek to raise the consciousness of man, then, above that level of selfishness - above the level of the self will - and help mankind to seek the universal will, that will of the God within. To express the divine love and the divine will is the nature upon which man must stand if he is to find God and his godly service. As you have witnessed within the film last night, that the events that have been taking place over the last few days - I have been working diligently through this embodiment to bring about a certain level of Love within the universal expression of man's mind. As you can see, it is a very big struggle to come forth in a physical embodiment and try to manifest such light into the world. It is so full of darkness as yet. True, the world has begun their upward climb in its conscious-

ness. It has begun to search, greater than ever before, for that universal Love and that universal expression of God. But as of yet, the darkness outweighs the light. It is still a great burden upon this soul in coming into the physical manifestation and having to ever struggle with the darkness and the ignorance. It is a blessing indeed that you and others like you are of service into humanity, for it helps individuals like myself through this embodiment and other embodiments like this to be able to come forth and to be of service to humanity and to help to fulfill something of the divine will and to help bring forth the divine Love. This expression has struggled greatly over many lifetimes trying to bring about some levels of perfection in humanity - sometimes expressing that perfection to his own humanity and other times helping other people around him to focus on their perfection. By bringing mankind into the ultimate reality that they are perfect and that they are divine. Eventually, man will rise up out of the darkness and out of the mire that he has buried himself in and will begin to see the face of God above him and within him. Then the Divine Light, the Divine Will and the Divine Love will begin to express itself fully upon the Earth. Until that time there are many struggles yet to come. There are many who fight against the Divine Light, who do not wish that Divine Love to manifest within the universal consciousness of man - and it struggles ever to bring darkness back down into the minds and hearts of man and to hold him in bondage here in that darkness. This is the eternal struggle. While the soul is caught up in the wheels of karma, while the souls of men return into the physical universe daily, yearly, lifetime after lifetime, it is a great struggle to bring the soul into the light. For these individuals who seek to tie them down in the darkness have great controls over the energies of the physical universe. And so we diligently work, we daily struggle and we constantly

pray to the Higher Light of God within to come forth and manifest as best as possible the greater light of universal Love and consciousness, hoping that daily somewhere, someone will begin a search for the divine truth within. Hopefully we can reach out and help them to touch that divine spark. It is up to each individual to ultimately walk the path alone and find the divine light within. But we can help - we can aid and we can guide - and that we do the best we can. This particular incarnation is going to have a great deal of service yet to perform for humanity before leaving this incarnation. He is still struggling with the awareness of all the things that he must do, but he is beginning to allow himself to be molded into the higher pattern of Light, into the divine pattern of Light. He has sought through his writings as a child that the divine will be his will, that the divine love be his love and that the divine motivation of Light be his divine motivation of Light. Little did he know at the time that he wrote those expressions on paper, how important those statements were in his consciousness. For then he was implanting the seeds of the fruit of the vine of today. And truly he is beginning to open up to those divine qualities, those divine expressions. Slowly, he is beginning to allow himself to be molded by the divine Light within, giving up the personal, giving up the self. In the giving up, it is painful. I and other masters support him in that pain and in that growth and in that development. And you and others like you are also helping him in that divine growth towards expression of the Father within, and for this we give thanks unto you. But let it be known that this is your purpose, this is your mission. This is the divine will within you. This is the divine Love and the divine Light expression within you. Though you are not totally aware of the alignment of the soul to the body within yourself, let it be known to your own consciousness at this time that the alignment is

manifested and fully expressed in your activities in life. True, the self does enter into the picture - self concern, self awareness, but overall the soul overrides the self and the soul wins. You have seen it... tape goes off... things to discuss.

JEF: O.K.

JG: At this time now I wish to bring in Michael, for he wishes to share with you a few things concerning the Foundation and its activities and where it needs to be going from here.

JG: M: In the Light of God, Blessings and Greetings from on high. This is Michael, the Archangel at this time speaking to you words of wisdom, hoping that through the wisdom expression you'll understand that which is to be. Greetings and Blessings. At this time let me first share with you that we are very pleased with the activities that are being expressed within the Foundation. It is very good and very rewarding to see the activity within each of the minds, hearts and souls of those involved. There is a great drive forward within the Foundation energy and this brings us great solace in our desire to bring about peace and harmony within the individual expression of mankind. It is necessary that the Foundation find first its level of harmony and peace so that it can express the divine Will. And through that, then it will help other mankind energies to find their levels of harmony and peace so that they too can express the divine will of God. At this time we wish to express to you our greetings from the Father within and the divine hierarchy, for we have been working diligently to bring about understanding within certain individuals within the Foundation activity of the divine will and a Light that needs to be expressed through the Foundation. Gradually that light is being seen through their minds' eye and slowly, through that understanding,

JG: M: a balance of their desire to be of service to the Foundation is coming into place. This is very rewarding and fulfilling to us as it is to their own soul activity. You can still see great struggles within certain individuals within the Foundation group, but those struggles are necessary in order for the lower to drop away and the higher to come into manifestation. We are pleased with your activities and desires to further the blessings and the will of the hierarchy toward the development of certain instruments and ideas that will help to balance the humanity idea of God and of Health. It is necessary for these two things to come into balance within the minds of man in order for him to find balance and harmony in his own evolution - and to free himself from the bondage that the Law of Karma holds him to.

One moment, please, I need to realign the energies for a second.

Oh, we have a nice surprise which we will give to you a little bit later.

JG: M: At this time, though, let us further go into the Foundation activities. There is a great deal of light beginning to come forth in expression. Today that Light blossomed further with the coming together of energies of the Dr. friend in Beverly Hills and Jim. This Light began to glow many years ago when myself, the Archangel Michael, and a particular master, Master Jupiter, brought two individuals into schooling back in 1959. We introduced them to each other on the inner planes at the university level. At that time there was an overshadowing of the Masters with these two individuals in their education process so that today a greater wisdom is brought forth to the Foundation

JG: M: and to humanity, so that certain things can be developed that need to be known in the world today. It was no coincidence that Jim had met and worked with your doctor friend on the other side in school. She was a great Light and a great soul. She has served well in beginning the process of educating certain people to search within themselves for understanding of new instrumentation that needs to be brought about. Jim, also, is beginning to serve this Light and purpose as well. Just this morning we began to give him new insight into certain instruments and he has begun to write them down even though he does not understand that which he writes. It will be much the same as what was written in the past concerning Atlantean equipment that has been given to you by other sources. It will just be an expansion upon that awareness, but it will take certain scientific minds to come together to take this knowledge and to begin searching out the scientific truth that is expressed in these writings - not only Jim's but in others that have been given to you before. And with this knowledge and the search within to understand it, a great deal can be developed in the way of instruments and knowledge. It will bring about a certain level of balance within mankind's physical instrument - that being the physical, the emotional and the mental bodies. These are the three that must be focussed upon when developing these instruments, for these are the three that need balancing the most at this time. If these three vehicles are not balanced, the spiritual can not manifest properly. So first the physical must be brought into balance for the spiritual then to blossom forth. And we must make note here that it is important for the doctors and the scientists involved and that come into this activity that they, too, must come into some level of balance on these three levels in order for the spirit to work through them as well. If they do not achieve

this balance, they will not achieve the full wisdom that they are searching for. Therefore, it is necessary that they focus as well on their own physical, emotional and mental vehicle to bring these three into balance as one. And then, through that balanced state they can go within and find the spiritual understanding of knowledge that they seek. This is very important for them to understand this - for if they come in to the Foundation and to its activities in an imbalanced state, there is a chance that they will throw an imbalanced energy into the activities of the Foundation and cause things to be thrown off course for a short time. We will work diligently to keep things from going off course too radically, but it will be up to the individuals involved in the Foundation to also maintain a focus and to set goals and to stay upon the pattern that they have set forth and not allow individuals to come in and throw them out of balance or out of focus. We will work from this side, but those involved on that side must work as well to maintain a focus, to maintain a balance and to stay upon the path that has been set forth for them.... (Pause in tape)

Concerning the emblem: It is true that the emblem given to Jim... (tape goes off) JG: At this time we will go back again and try to bring about the communication with the Archangel Michael if you will give us just a moment.

JG: M: And so as I was saying concerning the emblem of the Foundation that was given to Jim some time ago - that is his interpretation of my energy flow as it enters into the manifested world that mankind lives in today. It is, in a sense, an insignia of me and my flow of energy into the manifested realms. Likewise, through Arthur who came up with a drawing of his impression of my energy flow - and as you have

seen, they are very similar, if not the same, because my energy manifests equally to everyone and the same to everyone, and so the interpretation will be the same if these souls are clear and pure in their understanding and their search. So, these two souls prove the identity of the Archangel Michael and prove the great flow of Light into the manifested world. But it is not necessary for the emblem of the Foundation to necessarily be my emblem. I gave that to Jim in an understanding of who I am and what I stand for. He interpreted it meaning the Foundation - information given to him at that time was important - it is and was at that time. And when I gave him my, if you want, initial through that insignia, he interpreted it as the insignia for the Foundation. It does not necessarily mean that it has to be so. The information given over the last few days concerning a new design - a simpler design - I think will be very important and will resolve the question as to what kind of emblem is necessary for the Foundation and how it should be presented to the world. We will be guiding you in this and I think already the design has been pretty well laid out for you - it is just a matter of simplification and bringing about an understanding of what that emblem will represent, both your interpretation - meaning the Foundation's interpretation of a conscious visual expression as well as then we will come through and give you our interpretation once the emblem has been decided upon.

(Very Long pause in Tape)

JG: LF: This is Little Fox. I come from the spirit world to bring to you a few words of information concerning your property. I, at one time, was a medicine man of an Indian tribe that had travelled to this area

JG: LF:

many times in search of a new homeland. Our tribe had been battled against by many Indians at our time and was almost wiped out completely. And in our search for land, we came to this place at one point, and even settled just north of here for a short time. In our travels going through here, I died very close to this piece of property that you live upon at this time, John. Because of that, my soul energy has remained very active here. I fell in love with the spiritual, astral realm that exists just above Tucson. I am aware of a greater light, yet I do not understand the greater light that is above me. But I know that I will find it one day in my search. This is why I have remained in this area, rather than wandering elsewhere. I have been invited to go to a hunting ground in Northern America that exists in the astral planes there, where many Indians live and dwell and have a very peaceful existence, but something tells me that the greater light above is more important than the hunting lodge that I have been invited to attend. So I stay in the astral realms here searching out a greater understanding of that divine light that is overhead. At this time though, I wish to share with you something of the property that you live upon, for I am very familiar with it having lived here for so many years. I died almost three and a half centuries ago and I have lived in this area a long time, witnessing many activities concerning your property. At one time what brought us to this land is that there was surface water nearby here and we settled near the surface water, trying to figure out where we would go that would be the safest. At that time, we were aware of a great and sacred deva energy that dwelled within this mountain just beyond this house. And further, in the greater mountain, there was yet another spiritual angelic energy. We do not

JG: LF: call it angelic but you do and can relate to that better than to the spiritual names we gave it. This angelic energy became so important to us that we stayed in this area for several years offering our love and understanding of his expression to us. This land, that you live upon now, became very blessed by the activities of this angelic being and the awareness of our love for him. And so there's a great upward flow of light that exists here. Now, I do not understand totally this upward flow. All I know is that it is like a river of water that goes upward rather than along the ground and it seems to go up into that light that I search to understand. From there I can give you no further understanding of it, but it seems to come from him that dwells within the mountain down to this land and upward unto that light. I hope that that will give you some understanding and I hope that by expressing this that yet greater souls will see that I am searching and come to bring me greater understanding as well. This river of light - that is the only way I can express it to you - it is just a light flowing like a river - seems to bring about a certain balance in this area that is very much needed. Unfortunately, it also draws many, many people to it thinking that it will bring about a healing or a balancing or an answer to their life. This is why this valley has become so popular, because they search out an answer for something in their life. This light, they hope and they sense, will bring about an understanding. There are three major areas where rivers flow like this in this valley that you call Tucson. This is one expression - the river that I live nearby here on your property. Another expression lies to the southeast of this valley and yet another one more centrally located within the valley itself. Through these three rivers, as they merge together above me - it seems that they then flow outward and in some way to

JG: LF: go forth and help mankind in the physical planes in the Tucson area. Because I lack so much understanding concerning these, I can give you very little understanding myself - what I see - what I feel - so I know very little concerning them - only that I have seen and witnessed this flowing energy from the great mountain angel or spirit down into this valley and then upward in three rivers of light and then it seems that they explode in a burst of light over this valley and try to somehow impose that light in some way into the fields of energy that I see around people. And this light sort of imposes itself upon these fields, hoping to make a change of balance for these people who are searching for understanding. Therefore, it is necessary that you keep the property, to some extent, in its virgin state - around the area that you have drilled for water. For it is nearly there that this river of light expresses its energy and it is necessary, then, to keep somehow, a purity of focus so that man will not cause an imbalance concerning this energy. Now, there are two lines of force that come into your property from underneath the ground. One comes from the corner of the property towards Tucson up toward the well areas that you have dug. Another one comes from behind the property from the angelic spirit - there comes from underneath the ground and to the well points itself. These energies will be protected, whether they are built upon or not and there is no concern about what mankind will do to these energies because they can not destroy that focus so long as the escape of that force is allowed upward. And this is why the area around your house is important - to keep that focus upward - free flowing - free moving, free expressed. So, in developing the land, if this area around your house is kept to some extent in a virgin state and less populated so that energies can.... 1st side of tape ends...

JG: LF: This is mainly the knowledge that I came to present to you. There is much more that I could share concerning the ancient Indian wisdoms, but yet maybe at another time during this week I will be allowed to come back and share those knowledges with you, for I have lived many, many lives as an Indian in this area and in the North American continent. Maybe sometime I can share with you further concerning those lives. I have been desirous of expressing this knowledge that I have at this time and so they have allowed me to come and express and for this I am grateful. I am told that by expressing this knowledge I will be giving it a greater understanding of that divine Light and so too, you have allowed me to grow spiritually and come into harmony, and for that I thank you.

(End this part of tape)

JEF: Through Shaffica Karagulla and her contacts with Jim, which we think will be very beneficial to the Foundation in turning out material for the future. We also know that ultimately laboratory work is going to have to develop and we are going to have to have engineering and technological help that can really go into force field investigation of the auras and that type of thing. It seems to me that the Foundation is getting ready now to welcome such a person, if we can find them. It is our understanding that an engineer or a technical help somewhere in the western part of the United States that could lend a helping hand in this very important line of investigation. Do you have anything that could offer us some insight as to where we could possibly find such an individual?

JG: This is where Mr. Spence is going to be of benefit to the Foundation.

And this is part of his mission in the Foundation service. He is to go forth and begin to investigate...tape interruption... that are being sought right now and universal awareness of energy and the manifestation and expression of radiation healing. Through his endeavors of search and research into these areas, he will find three individuals whom will be very beneficial in the research we are looking to do. We will leave it up to the individuals in the Foundation to analyze the experiments that he comes across and the research that he finds, and to deduce from those what steps you take as far as funding and development of laboratories. It will be up to those individuals involved in the Foundation to decide upon these. There are those out there that are waiting to come into the manifestations of expression within the Foundation energy and experimentation. It will be up to the Foundation to go forth and to find them. We can not bring each individual to you for then it goes against the universal law. This must go according to the light of development and through that the individuals within the Foundation itself must grow, and in that growth, they must go forth and search for understanding.

JEP: Yes. tape off...

JG: Yes, that would be very beneficial and it would be a very good idea to realign the thinking of the Foundation so that there is a better definition of plans upon which individuals are to be of service. At this time, as of yet, there's a great deal of dispersing of energies within the Foundation and a great deal of unaligned energies being expressed. There needs to be a realignment and in that realignment there will be a better expression. (Tape goes off)

JG: ...you will see I work diligently within the writing form, trying to always read (?) behind me something of the written Master, something of the written word that will give guidance into the future. This is very important but also later on it is also important for that soul to go forth and express in whatever manner it can possibly do - in physical form going forth and teaching and sharing and uplifting man in whatever it is he is trying to do at that time.
(tape goes off)

...a level of spiritual self respect and spiritual freedom. It will be necessary in the future that this embodiment not be so tied down to one group or idea - though he will continue to work through John Davis' energies of Coptic and John Petzer's energy of the Foundation - he must be free to make his selections of expression as time calls forth for - That is why in times to come it will be needed that he not be so supervised in the future under individuals that do not understand that which he is trying to do. At this time, you are here and you understand so that supervision is very beneficial. But in the future there will be those around that will not understand that which he is trying to do and it will tend to hamper his expression rather than give him the freedom to do so. So we ask of you to help him in understanding that. He needs to have self-awareness of the expressions he needs to be manifesting in the future. And he needs to find a way to come forth freely and not be so tied down to an organization or to an individual or group of individuals of supervision. He will have to be the one in charge of his life - not others in charge of him. We have always arranged in the past that he have that freedom so that he can go forth and really do that which he needs to do. He is struggling at this time - he does not want to go forth and do all that he knows he needs to be doing for fear of judgement,

for fear of persecution and for the pain that could lie ahead...

(tape off)

...service...May the Harmony and the Peace that dwells within the Light of God dwell within us. May we be of service unto the hierarchial masters - to their purpose, which is the purpose of the Father within. Let us unite in oneness at this time. Let us join in harmony, peace, light and love and be one in the spirit of God.

JG: C: Greetings, this is Cato: At this time myself and a couple of other Masters are present here in a conference room in Shamballa, not too far from this location. We have gathered together in order to come forth and answer a couple of questions you may have at this time and then give a statement of purpose.

JEF: We have a couple of minor questions. The other day when Fox came in - was that Running Red Fox that had made contact with me on previous occasions or was this a different person.

JG: No, Little Fox is a different Indian. He was a medicine man of a particular tribe of Indians that had been in this area at one time. During another lifetime he had also been a Hopi Indian. Your Running Fox was a younger child in his teens and is living in this area as well, but would not have any purpose in coming through.

JEF: One other little question that we had on our minds the other day. When Gene found the little pup up near the crevice on the mountain, we thought it very unlikely that that little pup could navigate the mountain and be up there, because he was really fresh, he did not have the soiled fur that one gets running across the desert and we

just wondered if he might have been a transplant for Jean to have as a little dog.

JG: C: This will go into some explanation, but let us explain it in this manner. The individual that the family had gotten involved with, who pretended to be a minister of God, was really somebody in service of the evil force, rather than the good force - if you want to term it evil and good. He was one who was out for his own ego - for his own benefit. Therefore, he was out to hurt people in order to gain for himself. He had planned, at one point, to do much harm to that particular family. As a matter of fact, he had planned to offer them in sacrifice and was going to have them killed. It was necessary for us at that time, then, to make arrangements so that the accident did occur to get the family away from him. This was the only way, really, to preserve them and to keep them from getting caught up totally in the karmic pattern of the past. Unfortunately, it damaged her leg, but rather, it's better to lose her leg... tape goes off...someone who cared and was willing to work with her if she would only work more toward the inner spiritual life and not deal so much with people outside of herself. It was an offering of protection. She has a great deal of spiritual protection from the other side and this dog is an indication of that protection. We had arranged, not we the hierarchy, but we on the other side - a certain group of her guardians - had arranged that someone would bring the dog out in this area, which they did - it was a young woman who was very attached to spiritual life and who was very attuned. She was told to bring the dog out into this area and to leave it and that we would protect it from there and then to leave it and that it would find its rightful owner. This woman had raised it from a young pup

JG: C: and it was time now for this dog, as a sign of protection, to be given up by this woman who raised it and allow it to go to the rightful owner. So we then arranged for that dog to be here for her as a sign of God's love and God's protection for her.

JEF: That's marvelous. That's really wonderful to know and I'm sure she'll be happy to know that you are giving an affirmative interest in her life, because she does seem to be a very devoted person. I knew this man Thomas, the preacher, who engineered all this and he undoubtedly was responsible for the death of four or five others that were in that group.

JG: C: There have been others that have died, yes. It is a karmic situation from ancient China, in which this young man, Thomas, was a Mongul leader at the time, and he overruled a great portion of China with the Mongul warlords of China. At that time, he ruled over this particular family and several other families and was quite brutal to them if not very cruel. At times he offered them up and in killing them, he offered that as a sign of his strength over them. He would take someone and torture them to death in front of the other peoples' eyes to show his power over them, to make them obey and in the same way, he was doing it once again - offering these people up as sacrifice to scare the others and make them follow and obey him. It was necessary for this family to break away from that karmic bondage. This was the first time since that lifetime that they have come back under his influence, fortunately. Others of the group had been involved with him through several different lives since that Mongolian life. It was necessary for us, to protect this family, to keep him from getting more involved in the karmic pattern and there was no sense

for them to be offered up as sacrifice. And so a circle of protection was put around them. To keep them from actually being killed, we arranged for the accident.

JEF: My, that's a marvelous ending to a very tragic situation that we went through here several years ago in connection with all of this. Thank you so much for giving us this light. This is very helpful and I know the family will be very grateful to know this.

JG: C: You might wish to also indicate to Jim this fact - that the headache that he had yesterday was caused much by this same individual's energy coming into the area. If you will remember, he had mentioned that he had been doing healing or working with a group of healers in this area. What had happened is that this individual presented himself to be a great healer to people and tried to make them think that he could perform miracles. This individual really did more harm than good in this area and so Jim has been going out nightly with us, working with individuals, trying to bring them into balance and as well to bring other people into balance that have been touched by healers in this area that are not quite sure how to go about manifesting the healing that needs to be done. This is what caused his headache - he has been stressing himself in that way but it is a work that needs to be done and he is willing to do it. Some of this, he is not totally aware of such as having to deal with this particular Thomas energy and battling with it - here on the property as well as elsewhere. But that energy now is pretty well dissipated and will not touch anyone here again.

JEF: That's wonderful to know. And it does mean that the property is now

free and clear for its divine purpose as originally intended.

JG: C: Very much, yes. There had been a negative lock put on it by this individual and the group that he is involved with for a period of time. And finally Jim has broken that lock that remained up until just a couple of days ago.

JEF. That's beautiful. Then it was necessary that all of this really be done and that Jim's visit to come out here and take care of a very affirmative situation that needed to be addressed. Right?

JG: C: Definately - for one thing - if you had built in improper places on the property, you would have created a channel lock where the energy flow of the particular line of flow from the great spirit of the mountain down into the valley would have been blocked and that flow would have caused great stress within this whole area, both on your property and in Tucson. By keeping that area opened - being aware of the area that needs to remain open, this flow can continue and the city will be better maintained energy wise.

RE: ...I am trying to determine what flow should be taken as far as the
FOUNDATION next steps are concerned. Fortunately, the group is developing and
The Foundation is becoming a very positive minded, positive-oriented
controlled group - controlled in the sense that they allow spirit
to work within them even though at times they are not totally aware
that they are being guided by spirit, but at least they are following
the guidance, much like the young lady with the dog was. She knew
she had to bring the dog out here but she didn't know why and she
did not ask questions. The same with the group of the Foundation -

because they are sensitive, they are able to attune themselves at least to the desire of the hierarchy. Even though they are not totally conscious of why they are motivated to do the things they do, they are following our instructions to a great degree. Partly this is due to the fact that the core group meets weekly and harmonizes their energy as one. This allows our flow of energy, then, into their own consciousness to flow much easier than it would if this core group was not meeting. So at least at one point you can see that the core group is very beneficial. Also, with the signing of the lease on this new office, this is very beneficial as this will allow the energy to expand and grow. If it were to be maintained in the same office as it is now, it would be confined and the energy flow would not be allowed to have the freedom of expression that is needed if the Foundation is really to truly grow and expand at the rate that it needs to in the next few years. So truly, all of you are following the inner voice, the inner drive to create a flow of energy for the Foundation and its life. We are now beginning to work with plans within certain conscious people concerning architectural design. You will be led to individuals that will be very beneficial to you in this area. The young man - well, he isn't considered so young anymore, but we consider him young because he is young in spirit - but the man that you saw on TV last night might be very good to talk to. We do not know yet if we can inspire him with the right designs, but he is very easy to touch and motivate towards harmony with nature and harmony with man's spirit. This is very important and you might find it very, very beneficial to talk with him and at least see what he might have in store, plan-wise, for this property that you need to develop. He will take your ideas and try to develop them the best he can, but allow him the freedom to develop his own

ideas as well, for truly we can work with him in trying to inspire him with certain designs. If you do not feel comfortable - if you feel he is maybe a little too modernistic or too far out for the type of design you wish to present for the Foundation, then move on. There are several different architects that we can work with from this side and give them instruction from the subconscious level to help them develop the proper building. We will leave it up to you to feel out these individuals - to look at their designs and find the one that feels inspirational for you and find the one which the Foundation is going to be able to use.

JEF: I see. That's beautiful to know. We'll explore this with him and there's also this other architect in Bloomfield Hills that we have some information on - he has designed a lot of churches and buildings over the world that seem to be in the mode of what we're looking at. Think he would be a good one to contact also?

JG: C: Yes, again, there is an individual who has a great deal of inspiration and who is able to attune himself to the inner voice and come into some agreement with the design work that we would have in mind.

JEF: Very good. ...then proceed with the building of a Foundation building and gradually begin to build up in everything we need to do. And the other big move that must be made, it would seem to me, is that the Foundation must pursue becoming a private foundation rather than a semi-public one, in order to maintain our independence. Those are the issues that I know you will be just as interested in addressing as I will be.

JG: C: All these things are of vital importance if the Foundation is to be

successful. And yes, going private will be very beneficial because then there will be no threats to the control nor to the ideas of the Foundation. Otherwise, there will be threats, there will be dangers and there could be, in a sense, an overthrow of much of the good that could be done. So truly, this is the proper channel to take and we will leave it in your hands and in the groups' hands as to when the right time is to take the change.

End of Tape -
